

JUAN CORTÉS

FULL STACK DEVELOPER

ABOUT ME

Full Stack Developer with over 7 years of experience building scalable technology solutions. I combine strong technical expertise with a product- and results-driven approach. I have worked on projects across various industries, taking on technical, coordination, and architectural responsibilities.

Proactive and collaborative, I seek to contribute beyond the code: understanding the business, optimizing processes, and transforming ideas into impactful products. Passionate about innovation, continuous learning, and sharing technological knowledge.

EDUCATION

Upgrade hub

Bootcamp Full Stack developer
2019-2020

Universidad europea

Higher Technician in Cross-Platform Application Development
2016-2018

TECNOLOGÍAS

- Node.js - TypeScript
 - Relational and non-relational databases
 - React
 - AWS
 - CI/CD (Github actions)
 - Architectures based on DDD and Clean Architecture
-

LANGUAGES

- Spanish (NATIVO)
 - English (B2)
-

PROFESSIONAL EXPERIENCE

Full Stack developer

Factum - Mar 2024 – Present

- Lead the development of projects from scratch, defining architecture, code structure, and deployment strategies.
- Serve as the team's technical lead: conducting code reviews, providing mentorship, and championing best practices (SOLID, DDD, Clean Code).
- Develop using TypeScript, React, Fastify, and Node.js; manage CI/CD pipelines with GitHub Actions and Azure App Services.
- Collaborate with Product Owners to align technical solutions with business objectives.

Full Stack developer

Crowdfarming - Oct 2021 – Mar 2024

- Participated in redefining the frontend architecture and optimizing the backend using a modular and scalable approach.
- Full-stack development with TypeScript, Angular, NestJS, AWS (Step Functions), and Webpack Module Federation.
- Promoted SOLID principles and code reviews, improving maintainability and technical consistency.

Frontend developer

IRIUM - Apr 2020 – Sep 2021

- Participated in web development using React, TypeScript, and Redux, applying best practices and testing with Jest.
- Implemented improvements to the technology stack and led mentorship for new developers.
- Contributed to the design of a reusable and consistent component system.

Analyst / Web Developer and QA Automation

CGI - Sep 2018 – Feb 2020

- Developed internal applications and automated processes for clients in the telecommunications sector.
- Programmed REST APIs with Node.js (Express) and developed web applications using React, Redux, and Sass.
- Automated E2E testing with Java, Selenium, Appium, and Cucumber.
- Integration of Docker, Git, and AWS environments in the early phases of the project.
